1895 STORV-MASKELYN *Crystallogr.* 99 A solid figure is symmetrical to an axis when every *radius vector* moving in a plane perpendicular to the axis and meeting a point of the figure would also meet corresponding points at the same distances from the axis at each revolution through an arc-angle of $2\pi/n$. The aspect of such a solid figure will not therefore be changed by a revolution of the solid round this axis through the angle $2\pi/n$, and any portion of its surface so revolving will move into a position in which it will be congruent with another portion of the surface entirely corresponding to it. DEF.—Congruence of this kind will be termed *metastrophic*, and such corresponding parts will be said to be *metastrophic* to each other. 1899 W. J. LEWIS *Crystallogr.* 18 We shall generally express the relation by saying that the like faces, edges and coigns disposed about an axis of symmetry are interchangeable or *metastrophic*.

1887 *HYATT in Proc. Boston Soc. Nat. Hist.* 397 The proper name for these stages would be Metembryo, in allusion to the fact that the ovum at this stage is probably essentially a Metazoan.

Hence **Metembryonic** *a.*, 'of or pertaining to a metembryo' (*Cent. Dict.* 1890).

Metempiric (metempirik). [f. *META* + *EMPIRIC*.]

Introduced, together with the related words, by G. H. Lewes in 1874.]

1. (Also **Metempirics** with sing. construction: cf. *metaphysic*, *metaphysicis*.) The philosophy of things that lie outside the sphere of knowledge derived from experience.

The writers quoted differ greatly in their application of the term, but the question between them is what is meant by 'experience'; the definition given above would be accepted on both sides.

1874 *LEWES Probl. Life & Mind Ser.* i. 1. 18 Metempirics sweeps out of this region in search of the otherness of things. 1881 A. BARRATT *Phys. Metempiric* xi. (1883) 130 Any metempiric which does more than numerically multiply, or vary in degree, existence such as we have it in experience, or which postulates beings whose qualities bear no resemblance to those of experience, must be at once rejected.

2. One who believes in or supports metempirical philosophy; a metempiricist.

1881 A. BARRATT *Phys. Metempiric* iii. (1883) 19 Every man who believes in the consciousness of his fellows—every man who uses the word 'we'—is a Metempiric. 1882 in *Ogilvie*, and in later *Dicts*.

Metempirical (metempirikāl), *a.* [f. *META* + *EMPIRICAL*.] Pertaining to matters outside the range of knowledge derived from experience. Also, of opinions and their advocates: Maintaining the validity of concepts and beliefs based otherwise than on experience.

1874 *LEWES Probl. Life & Mind Ser.* i. 1. 17 If then the Empirical designates the province we include within the range of Science, the province we exclude may fitly be styled the Metempirical. 1881 A. BARRATT *Phys. Metempiric* ii. (1883) 17 The simplest Metempirical assumption, and one made by every man, is that there is a Metempirical existence, that he and his own experience are not all that has ever existed. 1888 *Athenæum* 11 Feb. 1884 It appropriated for empiricism doctrines hitherto the special property of metempirical schools.

Hence **Metempirically** *adv.*, in a metempirical sense or manner.

1884 *Spectator* 2 Feb. 1861 Every atom... is... 'metempirically', as he [sc. Barratt] calls it—a centre of consciousness.

Meter: see METRE¹ and 2.

-meter, in actual use commonly -o-meter, and in some later formations -i-meter, a terminal element in words denoting scientific instruments for automatically measuring something. Many words with this ending, as *barometer*, *hydrometer*, *hygrometer*, *thermometer*, were formed in the 17th c., and represent mod.L. forms in -metrum (F. *-mètre*, It. *-metro*). In these early examples the ending is always appended to Gr. noun-stems, or combining forms in -o, and the mod.L. form shows that it was intended to represent the Gr. μέτρον measure (see METRE¹); the formation is irregular, as the Gr. word does not occur in combination with sbs., and would not correctly express the required notion of 'instrument that measures'. In the 18th and 19th c. many additional words were formed with this ending on Greek bases, as *actinometer*, *anemometer*, *chronometer*, *eudiometer*, etc. Near the end of the 18th c. hybrid formations began to be introduced (many of them first occurring in Fr.). In some of these the form of Greek compounds is imitated, as in *gasometer*, *galvanometer*, *alcoholometer*, *lactometer*, *pedometer*; in others the combining-vowel *i* of the Latin first element is retained, as in *calorimeter*, *gravimeter*, *densimeter*, *velocimeter*. In some late formations -meter is appended to modern words without any attempt to assimilate the form of the first element to that of a Gr. or Latin combining form, as in *voltanmeter*, *ammeter*. Cf. also the names of electrical measuring instruments mentioned under METER *sb.* 1 b, which might perhaps be more correctly viewed as examples of the suffixed -meter than as examples of the sb. with defining word.

Jocular nonce-words in -ometer have been frequently formed; chiefly in imitation of Sydney Smith's FOOTOMETER, with the sense 'a means of measuring or ascertaining the opinion or prevalent

character of some class of people'; also occasionally in names of imaginary instruments for measuring the amount or degree of something, as in *obscenometer*. Similar hybrid formations have sometimes been adopted as trade names for certain instruments, e.g. *comptometer* [F. *compte* account], a kind of calculating machine, *distance-meter*.

Methinks (mɪθɪŋks), *impers. v.* Now arch. and poet. Pa. t. methought (mɪθɔ:t). Forms: see below and cf. THINK v.1 [OE. *mē þyncþ* (pa. t. *mē þūhte*), where *mē* is dative, and *þyncþ* the 3 pers. sing. of *þyncan* to seem: see THINK v.1.]

As THINK v.1 did not, exc. in this phrase, survive beyond the 14th c., and had no very wide currency after 1250, the syntax of *methinks* became obscure. Hence it underwent various alterations of form. The verb being supposed to be THINK v.2, it followed that it ought to be in the first person; hence the form *me think*, in which probably the pronoun was still correctly apprehended as a dative. In the 16-17th c. there occur the forms *my think*, *my thought*, which are attempts to obtain a normal syntax by taking *think*, *thought*, as sbs. The curious form *methoughts*, used in the 17th and the first half of the 18th c., prob. owes its *s* to the analogy of the present tense *methinks*.]

It seems to me. (Used with dependent clause or parenthetically.)

Methodist (mɛˈpɛdist). [ad. mod. L. *methodista*: see METHOD *sō.* and *-IST*. Cf. F. *methodiste*.]

1. *Hist.* A physician of the 'methodic' school. (See *METHODIC* a. 1.) In the 17th c. sometimes applied to the regular or orthodox medical practitioners of the day, in contradistinction to those who favoured the use of new remedies.

According to Celsus, the members of this school (called in Latin *methodici*, in Gr. *μεθοδικοί*) differed from the Dogmatic school in basing their treatment not on principles deduced from a classification of diseases according to their origin, but on the theory that morbid conditions consisted either in 'looseness', 'tightness', or a mixture between the two (*fluxus*, *strictus*, *mixture*), each of the three states having its appropriate set of remedies. The founder of the school was Themison, about A.D. 100.

4. a. Originally, a term applied to the members of a religious society (nicknamed 'the Holy Club'), established at Oxford in 1729 by John and Charles Wesley and other members of the University, having for its object the promotion of piety and morality; subsequently applied to those who took part in or sympathized with the evangelistic movement led by the Wesleys and George Whitefield. b. In later use, a member or adherent of any one of a number of religious bodies or denominations which originated directly or indirectly from the labours of the Wesleys and Whitefield.

In England, the designation belongs especially to the members and adherents of the Wesleyan-Methodist Society founded by John Wesley, and of the various other bodies that have proceeded from it or from each other by succession, as the New Connexion Methodists, the Primitive Methodists, the United Methodist Free Church, and others. All these bodies accept in the main the Arminian theology of Wesley, and in nearly all of them the ministers (called 'travelling preachers') change their place of abode after a certain period (usually three years). In the U. S. the most influential body of Methodists is the Methodist Episcopal Church, which was directly founded by John Wesley (who ordained its first bishop, Dr. Coke), and which is recognized by the English Wesleyan-Methodist Society as in full communion with it. There are also several other bodies in the U. S. that adopt the name as a part of their official designation. In Wales the name 'Methodists' commonly denotes the body more fully known as 'Calvinistic Methodists', which was founded by Welshmen influenced by the teaching of Whitefield; it is now federated with the United Free Church of Scotland and the Presbyterian Church of England.

The origin of the name, as applied to the associates of the Wesleys at Oxford, is somewhat obscure. Cf., however, sense 3a, and the 17th c. use in examples like quotes, 1647, 1658, in sense 2.

The *G. methyl* occurs in papers by Regnault in *Ann. der Pharmacie* XXXIII. 328 and XXXIV. 28 (1840). The

back-formation was suggested by the fact that *-yl* (which Berzelius preferred to spell *-ile*), from the Gr. *ύλη* in the sense of 'matter', had already been used in names of organic radicals (*benzoyl*, *Wöhler* & *Liebig* 1832 *ethyl*, *Liebig* 1834). The analysis of *methylene* into *methyl* + *-ene* gave rise to the use of *-ene* as a chemical suffix, as in *ethylene*, *benzene*, etc., and the identification of the last syllable of *methyl* with the suffix *-yl* led to the use of *meth-* as an element in the names of substances connected with or derived from wood spirit.]

2. (= MEZZOTINTO 2.) A method of engraving copper or steel plates for printing, in which the surface of the plate is first roughened uniformly, the 'nap' thus produced being afterwards completely or partially scraped away in order to produce the lights and half-lights of the picture, while the untouched parts of the plate give the deepest shadows. Also, a print produced by this process.

The invention has often been ascribed to Prince Rupert, who certainly practised the method, and made it known in England; but it is now established that he learned it from a Hessian colonel, Ludwig von Siegen, of whom an example is extant dated 1642.

†**Miching malicho**. Occurs only in the Shaks. passage quoted, and echoes of it; of uncertain form, origin, and meaning.

It is probable, though hardly certain, that the first word is MICHING *ppl. a.* The conjecture that the second word represents Sp. *malicho* misdeed (whence Malone and subsequent editors print *malicho*) yields a fairly satisfactory sense; but there is no evidence that the Sp. word was familiar in English, and its pronunciation (*malicho*) does not account for the forms in the early editions.

1602 SHAKS. *Ham.* ii. ii. 146 Marry this is Miching Malicho [sic. *fol.* 1 (1623)] Q. 1 (1603) myching Mallico; Q. 2 (1604) munching Mallico, that meanes Mischeche. 1836 E. [Com. Teut. OE. *mickel* (also *mycel*) = OS. *mikil* (MLG. *michel*), OHG. *mihhil* (MHG. *michel*), ON. *mikkil*, also *mykell* (nom. and acc. neut. *miket*, *myket*, acc. masc. *mikenn*, *mykenn*; Sw. *mycken*, neut. *mycket*; Norw. dial. *myken*, neut. *myket*; Da. *myget* neut.), Goth. *mikils*:- OTeut. **mikilo*, corresponding to Gr. *μεγало*-, lengthened stem of *μέγας* great; the shorter form of the adj. is represented in Teut. only by ON. *mikil* adv., very, which formally corresponds to Gr. *μέγα* neut. The root **meg-* (represented also in Armenian *mels* great, and perh. in L. *magnus*) appears to be allied to the Aryan root **magh-* of Skr. *mah*, *maha*, *mahan* great.

The OE. form *mycel* (which is not a mere graphic variant of *mickel*, but stands for an actual pronunciation) is difficult to explain; it is commonly supposed to be due to association with *lytel* LITTLE *a.* The similar change of *t* into *y* in ON. *mykell*, *mykil*, is believed to proceed from the influence of the *u* in the inflected forms *miklu*, *miklum*; but this explanation is not applicable to OE.

The phonology of the ME. and modern forms is in many points obscure. Normally, OE. *y* would become in the S.W. *u*, pronounced (if), and elsewhere *i*; the abnormal *u* (in ME. also written *o*) of the *β* and *ε* forms has not yet been satisfactorily explained. The forms with *k* are northern and north-midland; the regular southern forms with *ch* are obsolete, having given place to the shortened *mick*, *Mucin*.

In present dialectal use the prevailing form is *uickle*; but *uickle* and *meikle* are often used by modern Scottish writers even when their own colloquial dialect has only *uickle*. The archaistic use in non-dialectal poetry is rare, and almost confined to the form *uickle*.

Originally *mid* in this sense could be used without restriction, but in mod. Eng. its application has been greatly narrowed. It is still extensively used in scientific and technical language; and it is common (though rather literary than colloquial) in advb. phrases formed with it prep., the article being most frequently omitted, as *in mid-career*, *in mid-volley* (see d); but the use of phrases of this type not traditionally current is apt to seem affected. The attributive use of the combinations of *mid* is also frequent.

[f. either MID a. or MID prep. + WIFE (in the older sense of 'woman'). On the former view the primary sense would be 'a woman by whose means the delivery is effected'; on the latter view, 'a woman who is with the mother at the birth'. The latter seems the more likely, though analogies are wanting for this mode of formation. The Sp. *comadre*, which is sometimes quoted, is not to the point, as the sense 'midwife' is merely developed from that of 'gossip', originally 'fellow-(god)mother'. The mod.G. *beifrau*, midwife's assistant, has also been compared.

The early (but not earliest) form *medewife* seems to be due to etymologizing association with MIEN sb., as *mede* does not otherwise occur as a ME. variant of *mid*-. The colloquial pronunciation (mid'f) is now seldom heard.]

mile (māil), sb.¹ Forms: 1 mil, 3-7 myle, 4-6 myl, 5 Sc. myll, 5-6 mylle, 7 millo. [OE. *mil* fem. = MDu. *mīle* (Du. *mīl*), OHG. *mīla*, *mīlla* (MHG. *mīle*, mod.G. *meile*), ON. *mīla* (prob. from OE.; Sw., Da. *mīl*):—WGer. **mīlja*, a. 1. Originally, the Roman linal measure of 1,000 paces (*mille passus* or *passuum*), computed to have been about 1,618 yards. Hence, the unit of measure derived from this, used in the British Isles and in other English-speaking countries. Its length has varied considerably at different periods and in different localities, chiefly owing to the influence of the agricultural system of measures with which the mile has been brought into relation (see FURLONG). The legal mile in the British Empire and the U.S. is now 1,760 yards. The Irish mile of 2,240 yards is still in rustic use. The obsolete Scottish mile was longer than the English, and probably varied according to time and place; one of the values given for it is 1,976 yards.

The use of the sing. form with a plural numeral is now only vulgar or dialectal; in the earlier part of the 19th c. it was recognized as permissible colloquially.

2. Used to render its etymological equivalent in other European languages.

In Italy (where there are many different miles), Spain, and Portugal, the 'mile' has been developed from the ancient Roman measure, and its length ranges between 4 and 14 English mile. In Germany, Austria, Holland, and the Scandinavian countries, on the other hand, the 'mile' seems to represent the ancient Germanic *rasa*, to which the Latin name was apparently applied arbitrarily; its values range from about 34 to over 6 English miles.

3. *Geographical, geometrical, † maritime, nautic(al)* mile: a measure of length = one minute of a great circle of the earth.

Owing to the fact that the earth is not a true sphere, the

'mile' as thus defined varies considerably, the difference between the extreme values being about 62 feet; when taken as a minute of the meridian, the value increases with the latitude, in consequence of the varying curvature. It has therefore been found convenient to assign a standard value for nautical use; the British Admiralty fixes it at 6,080 feet.

The militia consists of bodies raised by the several counties in numbers varying according to the population and other circumstances, the number or 'quota' to be provided by each shire being fixed by the government. Since 1803, the law has been that the quota may, if necessary, be raised by compulsory enlistment, a ballot being taken among the men between 18 and 35; but as sufficient numbers are at present obtainable by voluntary enlistment, a 'Militia Ballot Suspension Act' is passed annually. The militia are bound to assemble for 28 days in every year for training, and may at any time be embodied for compulsory service within the kingdom, but cannot be sent abroad except as volunteers, and then only by consent of Parliament.

1. One whose trade is the grinding of corn in a mill; the proprietor or tenant of a corn-mill. Also (*2 dial.*) applied to that workman in a mill who has charge of the actual grinding.

The OE. word was *mylnweard* (lit. 'mill-keeper': see *MILLWARD*), denoting the custodian or manager of the mill belonging to the lord. The word *mill* would have the same application so long as 'the lord's mill' continued to be one of the customary appurtenances of a manor.

7. In proverbs imputing to millers dishonesty in the taking of toll.

The proverb given by Ray seems to mean that there are no honest millers, and to allude to the use of the thumb in taking toll of flour. It is probable that this is the original form, and that Chaucer and Gascoigne played upon the phrase, taking the 'thumb of gold' to mean one that brings profit to the owner.

¶ In mod. colloquial use the to of an inf. suppressed by ellipsis is often retained. (See *To prep.*)

The quotes below enclosed in square brackets are probably to be explained as instances of the idiom by which a prep. governing a relative expressed or understood is removed to the end of the sentence (cf. quotes 1674, 1711, 1726 in d). But the indefiniteness of the antecedent and the presence of a transitive verb in the sentence render the passages liable to be taken as anticipations of the modern colloquial practice, which may indeed have been partly developed from expressions of this kind.

The origin of the Fr. word is doubtful. The evidence seems to point to the derivation of the sb. from the vb. (see *MINE* v.), which in the earliest instances had the general sense to excavate, make underground passages, undermine. (The alleged gtl. ex. of med. L. *mina plumbi* 'lead-mine' given by Du Cange is from a spurious charter.) This renders it difficult to accept the otherwise plausible connexion of the sb. with the O.Celtic **main* ore, metal (Welsh *maen*, Irish *uain*).

In Sc. the longer form was commonly used in all contexts down to the 15th c.

4. Ecclesiastical and religious uses.

a. In Pre-Reformation English, applied to a person in orders officially charged with some function in the celebration of worship in a particular church, chapel, chantry, etc. In the rubrics of the Book of Common Prayer the word denotes the clergyman, or any of a number of clergymen, engaged in conducting worship on a particular occasion.

Then shall the Priest say the Lord's Prayer.

b. In phrases such as *minister of the church*, of the gospel, and the scriptural phrases *minister of God*, of *Jesus Christ*, of the sanctuary, applied as general designations for a person officially charged with spiritual functions in the Christian Church. Hence from the 16th c. onwards (after the example of foreign Protestant, esp. Calvinistic, use) employed *absol.* in the same sense, at first chiefly by those who objected to the terms *priest* and *clergyman* as implying erroneous views of the nature of the sacred office. The use of *minister* as the designation of an Anglican clergyman (formerly extensively current, sometimes with more specific application to a beneficed clergyman) has latterly become rare, and is now chiefly associated with Low Church views; but it is still the ordinary appellation of one appointed to spiritual office in any non-episcopal communion, esp. of one having a pastoral charge. The term *minister of religion*, as applied to a 'clergyman' or 'minister' of any religious denomination, is common in official use.

1. A kind of fur used as a lining and trimming in ceremonial costume.

French lexicographers say that *menu vair* is the fur of the *petit-gris*, a variety of the common squirrel. What the Eng. *miniver* meant in early use is uncertain; some have supposed that it was the white fur of the Siberian squirrel; the application may have varied at different times, but etymology would suggest that it must have been an artificially spotted or variegated fur, with a smaller pattern than that of *vair*. In 1688 R. Holme explains *miniver* as 'plain white fur', and this (notwithstanding Cotgrave's divergent explanation) may have been the meaning of the word as used with reference to the costume of judges and the lower nobility in the 16-17th c. In this sense the term was revived in the official regulations for the coronation of Edward VII, and it has since had some currency in the description of the ceremonial costume of peers.

Pured miniver, miniver pure = AF. *meniver puré*, 'powdered miniver'; but in modern times the adj. has been misinterpreted as 'pure white'.

c. *Minor determinant*: a determinant whose matrix is formed from that of another determinant by erasing one or more rows and columns.

1850 SYLVESTER in *Philos. Mag.* Nov. XXXVII. 365 Now conceive any one line and any one column to be struck out, we get, a square, one term less in breadth and depth than the original square; and by varying in every possible manner the selection of the line and column excluded, we obtain, supposing the original square to consist of n lines and n columns, n^2 such minor squares, each of which will represent what I term a First Minor Determinant relative to the principal or complete determinant. Now suppose two lines and two columns struck out from the original square... These constitute what I term a system of Second Minor Determinants; and... we can form a system of r th minor determinants by the exclusion of r lines and r columns.

4. Logic. *Minor term*: the subject of the conclusion of a categorical syllogism. *Minor premiss*, *proposition*: that premiss of a syllogism which contains the minor term.

(ed. 2) 96 The proper order is to place the Major premiss first, and the Minor second; but this does not constitute the Major and Minor premisses; for that premiss wherever placed is the Major which contains the Major term, and the Minor, the Minor. 1843 MITT *Logic* II. II. § 1 The premiss, which contains the middle term and the minor term is called the minor premiss of the syllogism.

6. *Mus.* a. Hence also applied to the note distant by a minor interval from a given note. Also, in acoustical theory, applied to the smaller of two intervals differing by a minute quantity, as *minor tone* (vibration ratio $\frac{9}{8}$, being less by a comma than the *major tone*, $\frac{10}{9}$); so, occasionally, *minor semitone* (usually called *chromatic semitone*).

Gr. *Μινώταυρος* (L. *Minotaur-us*, OF. *Minotaur*, F. *Minotaure*), f. *Μίνως* Minos + *ταύρος* bull.] A fabulous monster, the son of Pasiphaë, wife of Minos king of Crete, and a bull, represented as having the body of a man and the head of a bull. He was confined in the Cretan labyrinth and fed with human flesh. He was slain by Theseus, who thus freed Athens from her annual tribute of seven youths and seven maidens to be devoured by the monster. Hence used allusively.

2. In early use (i.e. down to the end of the
16th c.), a general designation for any one whose
profession was to entertain his patrons with sing-
ing, music, and story-telling, or with buffoonery or
juggling. In modern romantic and historical use
commonly with narrowed and elevated applica-
tion: A mediæval singer or musician, esp. one
who sang or recited, to the accompaniment of his
own playing on a stringed instrument, heroic or
lyric poetry composed by himself or others.

The use of the word in romantic poetry and fiction has
so coloured its meaning that the application to a mere jester,
mountebank, or conjuror, originally common, would now
seem inappropriate.

1. A marvellous event occurring within human experience, which cannot have been brought about by human power or by the operation of any natural agency, and must therefore be ascribed to the special intervention of the Deity or of some supernatural being; chiefly, an act (e.g. of healing) exhibiting control over the laws of nature, and serving as evidence that the agent is either divine or is specially favoured by God. Phrases, *to do*, *to make*, *work*, *to show* a miracle.

The L. *miraculum* in this sense, though common in patristic and later theology, is foreign to the Vulgate, in which the Gr. words rendered 'miracle' in the English Bible—σημεῖον 'sign', τέρας 'wonder', δυνάμις 'power' or 'mighty work', are translated respectively by *signum*, *prodigium*, and *virtus*.

Mis, obs. form of *MISS* sb.1 and v.1

Mis, (mis), obs. abbreviations of *MISTRESS*, *MISTRESS*.

Mis-, *mis*-, prefix¹ (also *1* (*rare*), 2-7 *mis*-, 3-6 *mis*-, *mysse*, 3-7 *mys*-, 4-5 *mes*-), represents OE. *mis*- = OFris. OS. *mis*- (MDu. *mis*(se)-, *mes*(se)-, Du. *mis*-), OHG. *missa*-, *missi*-, *mis*-, *mes*- (MHG. *mis*(se)-, G. *miss*-), ON. *mis*-, Goth. *missa*- (in *missadēþs* MISDEED, *missaleiks* different, various, see MISLICH, and *missagis* 'speaking diversely', disagreement, tr. Gr. *οἰστρον*):-OTeut. **misso*- (whence **missjan* *Mis* v.), repr. a pre-Teut. formation with ppl. suffix -to on a root ending with a dental. The adj. **misso*- seems to have had two senses: (1) divergent, astray, (2) mutual, alternate (cf. Goth. *missō* mutually). The first of these supports the identification of the root with the Teut. **mip*- to avoid, conceal (see *MITH* v.); the two senses may be accounted for by the supposition that the primitive notion expressed by the root was that of difference or change. Phonologically, the Teut. root might represent a pre-Teut. form either with *t* or *th*. On the former view, some scholars regard it as cogn. w. L. *mittēre* to send, let go; but the sense seems too remote. On the other assumption, it would be cognate with Skr. *mīth* 'to meet as friend or antagonist, alternate, engage in altercation' (M. Williams), *mīthu* 'alternately, falsely, wrongly', *mīthas* 'mutually, reciprocally, alternately', *mīthya* 'invertedly, contrarily, incorrectly, wrongly'; cf. OSL *mīð*, *mutist* alternately. The root **neith*- in these words is by some regarded as an extension of **nei*- to change: see MEAN a 1

In OE. and ME. MSS. the compounds of *mis*- (as of other prefixes) are written sometimes as two words, sometimes continuously, the hyphen being never used. From the 16th c. onwards the compounds are regularly printed as one word, with or without the hyphen, which becomes, however, less and less frequent, and is now employed chiefly in new or rarely-used formations, and in words like *mis-say* or *mis-eat*, where its omission would tend to disguise the identity of the compound or suggest a wrong pronunciation. (In Sir T. More's Works 1557, the spelling of the compounds as two distinct words was retained, e.g. *mis-se-remember*, *mysse rule*.) The spellings *mispe*, *mispend*, etc. for *mis-spell*, *mis-spend*, etc. were once common and are found as late as the end of the 18th century.

The predominant meaning of the prefix in English, as in the other Teutonic languages, is that of 'amiss', 'wrong(ly)', 'bad(ly)', 'improper(ly)', 'perverse(ly)', 'mistaken(ly)', and this is the only one now recognized in the formation of new compounds. But even in OE. there are instances of its use as a mere negative prefix and also as a pejorative intensive with words of sinister meaning (see 7 and 8 below).

In early ME. a great extension of the use of the prefix took place, *mis*- being freely combined with words of indigenous and of foreign origin alike. Many of the new compounds appear to have been suggested by French formations with *mes*- (see *MIS*-2); thus we have *misbelieve* after OF. *mes-croire* (mod. *mécroire*), *misfortune* and *misshape* after OF. *meschance* (see *MISCHANCE*); a word like *misjudge* has prob. a double origin, being partly of native formation, and partly an adaptation of OF. *mesjurer*. The most prolific period for the formation of *mis*- compounds was the 17th c., to which a considerable number of those illustrated in this article belong; Bacon, Donne, and Bp. Hall are noteworthy as employing them largely. They still continue to be formed with considerable freedom, but in certain cases *ill*- and *mal*- are now preferred where writers of earlier periods would have preferred *mis*-.

In the ME. period *mis*- became to some extent a separable prefix; thus we have *immen mis* and *misnumen*, *don mis* and *misdon*, *seyn mis* and *misseyen*, side by side. (See further under *MIS* a. and adv.) Even as late as the 16th c., the prefix was sometimes co-ordinated with an adj. or adv., as in the example *very erroneous* and *misopinions* (see *MISOPINION*). A related phenomenon, of which an instance is found as late as the 17th c., consists in the dropping of the prefix before the second of two compounds coupled together, e.g. *ich abbe mis-seien mid egen*, *mid mine eren iherd* (Lamb. Hom. p. 189), *myslyuyng and techynge* (Wyclif), *misgyed and led*, *ye mis happe and cheue* (Hoccleve), *for thou hast mis-said or done* (J. Davies *Ecl.* 1614).

In OE. *mis*- was prefixed to verbs, active and passive participles, nouns of action and condition,

and adjectives. In ME. its composition with nent-nouns and adverbs followed as a matter of course, and the principle of prefixing it to any word of the above classes, existing either actually or potentially, became soon established. Hence, in a group of formally related words such as *misrepresent* vb., *misrepresentation*, *misrepresentative* adj. and sb., *misrepresentatively* adv., *misrepresent* and *misrepresenting* vbl. sb. and ppl. a., it is possible (unless there is historical evidence to the contrary) that each member may have been formed independently of any of the others.

All those compounds of *mis*- with respect to which there is evidence of a continuous history during any period, or which belong to a group, are treated in their alphabetical places. Those illustrated in the present article are for the most part nonce-words of obvious meaning.

1. Prefixed to verbs, with the meaning 'amiss', 'badly', 'wrongly', 'perversely', 'mistakenly'.

In OE. about 40 of such compounds are recorded, of which less than half are represented in ME. or mod.E. (see *MISBEDE*, *MISDO*, *MISFARE*, *MISFEERE*, *MISLEAD*, *MISLINE*, etc.). As now apprehended, the prefix normally implies not censure of the act itself, but only of its manner. With this restriction, nonce-words may be formed very freely. In the 17th c. the use was much wider, and many of the formations of that period would now be inadmissible.

b. In the 14-16th c. a few verbs like MISDEEM, MISTHINK, in which the prefix had originally its normal function, developed new senses in which it had the force of 'unfavourably'. Then also arose a few new formations, such as MISBODE, MISDOUBT, MISDREAD, in which *mis-* was prefixed to a verb expressing suspicion or fear, in order to render more fully the notion of uneasy feeling contained in the vb. These new senses and combinations, however, now survive only as *arch.* or *dial.*
